

Second Annual Change Leadership Collaborative

Emerging Directions of Change Leadership

Wednesday March 3, 2010 | Toronto, Canada

Sponsored by  The Potential Group

Join us for the Second Annual Change Leadership collaborative, where we will bring together leaders from across sectors to share stories, expand learning and re-inspire our work of transforming and innovating the systems in which we live and work. This year our focus will be on Emerging Directions of Change Leadership. We will share our budding perspectives about what it takes to make generative futures in organizations and communities and, we have an inspiring line-up of speakers who will be sharing their stories of bringing out the best in their systems. If you are interested in getting even more out of your organization or community, please consider being a part this generative conversation.

The day will be highly interactive, blending inspiring stories and meaningful conversations in the full community, small groups and duos. All participants will have a chance to explore, reflect on and collaborate around what they have learned about igniting and sustaining innovation and transformation in their organizations and systems.
